## SKILLS

Vanilla JS

NodeJS

Linux

Rust

Typescript

Initiative

Communication

## LANGUAGES

Spanish

*Native or Bilingual Proficiency*

English

*Full Professional Proficiency*

Catalan

*Limited Working Proficiency*

## INTERESTS

Open Source

Tennis

Legos

Ethical Hacking

## WORK EXPERIENCE

### Software Developer

#### Utopic

01/2019 - Present

*Tech Stack: Vanilla JavaScript, React, NodeJs / Express, Firebase*

##### Achievements/Tasks

- Created a Front-End in React that handles custom forms for creating different types of users with different privileges from admins to door admission people to the final user. Using react-query for all the queries to the servers because of the great convenience and performance.
- Created a Back-End this node/express server also handles the authentication for different privileged account holders for the front end and handles validation and the processing of data.
- I intended this server to be modular so in the case that if we had to change database provider it wouldn't be so traumatic. Segmentation into Microservices in the future would be ideal.

### Personal Projects

#### ww.leito.dev

*This is my personal webpage. I use it for experimenting and posting some portfolio projects.*

##### Achievements/Tasks

- Created different web applications for handling request to servers and handle different data using different state API's like: Context API and React-Query, I have also learned Redux but I haven't implemented it in personal projects.
- Used different browsers Web APIs to handle imports native for WebAssembly and using WebRTC.

## ORGANIZATIONS

Utopic (01/2019 - Present)

## PERSONAL PROJECTS

Portafolio (05/2020 - Present)

- My different projects that I have built, this are available in my website.

## EDUCATION

### Tourism

Universidad Autonoma de Madrid

09/2015 - Present

Madrid
